### The Mechanics' Fair.

Amongst the Musical Instruments on exhibition at this Fair is a Piano, entered by W. & R. Freeman, which, being a new invention, in part, is worthy of more than a passing notice. It is from the Wallace manufactory, New York, and constructed on the plan patented by Mr Spencer B. Driggs. It differs materially from the old mode of construction. Pianos, as generally made, it is known, are incased in a frame of great thickness, which is deemed necessary to bear the strain of the strings. In the new instrument the case is not more than half an inch thick, adding considerably to facilities for transportation as well as the sonorous tone of the instrument. Inside the case is an Iron frame above and below, boited together, sustaining the whole strain of the strings, and leaving no stain whatever on the wooden case. In fact, the instrumental part of the piano is entirely independent of the case, and is of course not subject to the variations from weather, unsersoned wood, and other causes of the old instruments, and as a sequence remains in tune much longer. But the most original feature after all in Mr. Drigge' invention is the construction of the sounding boards, of which there are two. The upper is constructed al; together differently from the old method, which is to glue the sounding board to the case, and make it stiff and resonant by means of tranverse ribs. In the new plan the sounding board is not glued to the case, but is fixed tightly into a thin iron frame an arched or convex form, like the upper part of a violin. By a most ingenious contrivance the bottom of the piano is converted into a second sounding board by dispensing altogether with the heavy planking which forms the bottom of the old instrument, and substituting a thin layer or veneer of wood like the upper sounding board, pres-ed like shape. The effect of this will be at once perceived, The piano becomes a huge violin, as sensitive to vibration, as sonorous and as capable of producing the delicate symp thetic sweetness of that instrument. The sounding boards are connected by three sound posts, by which the vibrations of one are communicated simultaneously to the other, producing an effect that it is impossible to describe.

We are indebted for this description to the New York Herald. The most striking advantage gained by the new method are greater richness and purity of tune, and an immense increase of power Thalberg, Strakoseb, W. Vincent Wallace, and oth er distinguished Pianists and Composers, unqualfiedly approve and recommend this Plano. The Messrs. Freeman deserve the thanks of the community for their enterprise in introducing this in-

Lyons & Co., exhibit samples of cigars manufac tured by themselves in this city. They are very tempting to the lovers of the weed, and attract considerable attention. These cigars are, we are informed by a gentleman who has tried them, equal in quality to any imported into this market, being made of the very best tobacco. These gentlemen are manufacturing extensively, employing a considerable number of operatives. We have noticed heretofore a marble clock, ex-

hibited by Mr. Calhoun. The clock rests gracefully upon a beautiful marble mantle exhibited by Mr L Shelton, worker in marble. It is an exquisite piece of work, and much admired. Mr. Shelton may well pride himself upon it.

We have omitted to noteone of the useful machines in the lower room, and therefore take occasion to refer to it now, Sedgebeer's improved conical Burr Stone Mill. This mill is regarded as a most valuable improvement, free from objections which are made to others. It is manufactured in | Court Clerk. Election in March next. this city by Mr. Joseph Sedgebeer.

# The State Fair

Opens on the Fair Grounds, in this vicinity, this morning, with the exhibition of Woolen Goods, Cotton Fabrics, Silk and Flax Fabrics, Hemp Goods, Marble Work, Fine Arts, Architectural Designs, and Printing. In addition to the above a premium has been offered this day for the best pair of horses driven tandem. There will also be an exhibition to-day of coles of the celebrated trotting stallion Washington. Omnibuses, Hacks, &c., will be running to the grounds constantly, and a train of cars will leave the Chat tanooga Depot for them hourly. Fure on the cars ten cents each way. There ought to be an immense turn out to day, particularly of the ladies, as the work of their hands form the chief part of the

SUDDEN DEATH .- We regret to learn that Mr. Robt. Goodlett, an old and highly esteemed citizens of this county, whilst on his way to town, Saturday, in his buggy, was suddenly taken very ill, and died before any thing could be done for him Conscious that the hand of death was on bim, he bade his son, who was with him, stop at the house of a relative on the way side, where he yielded up "his spirit to the God who gave it," only as a Christian can. He was a devout member of the Cumberland Presbyterian Church, and had nearly reached in years the three score and ten allotted to

#### Mechanic's Fair. This exhibition will be continued to night, with a view to giving all who had not yet attended, an opportunity to do so. Its attractions have not been

diminished, but rather increased. Correction.-In our report of the election of City Marshal, we made a mistake in his name, it should have been W. M. BROWN, instead of M. W.

EXCHANGE BANK .- This bank is right side up vithout the shadow of a doubt. It is going ahead redeeming its notes. Every person who has had any opportunity of becoming acquainted with the condition of the Bank, has the utmost confidence in its standing. Its notes are teken readily by our citizens in all business tran-actions, and we say to our readers at a distance who are liable to be imposed upon by false runiors, not to lose a cent on any of the Exchange Bank money which they may have in possession. We will assure them that it is worth 100 cents to the dollar .- Murfreesboro' Tel.,

REPORTED DUELS AT WEST POINT.-The editor of the Rochester Democrat has seen a statement from a pretty reliable source, to the effect that a duel was recently fought between two officers at West Point, in which one was rather severely wounded. The other one, who had done gallaut service in Mexico, was at once ordered off to Utah, and the affair was not made public. The same authority is given for the statement that recently, while a corps of cadets were ordered on some special duty, the young men took offence at the orders of persons in command of the squad, and one of them ru-hed at the officer with his sword drawn, and at once commenced a furious attack. The officer stood upon his defence, and finally succeeded in disarming his opponent, who was all the while becoming more hot and rash.

In dispossessing him of his weapon, the cadet's sword arm was wounded. He retired to have his wound bound up, and while absent one of his companions assumed his place in the combat. The wounded man returned and again took his sword, and with increased violence attacked the officer, who found it necessary to use all his skill and vigor in parrying the blows of his antagonist. When the affair had become apparently one of life and death between the combatants, a senior officer came upon the ground and put an end to it. The cadets who participated in the combat were arrested, and it was supposed, would be dismissed. One of them, it is stated, is a son of General Jessup.

THANKSGIVING .- The Governor and Council of N. Hampshire have appointed Thursday, November purposely made too small for it. It thus receives | 26th, for thanksgiving day in that State. This is the first of the season.

### THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement For Roofing.

THE subscriber is now prepared to cover roofs of build-ings, with a new and better article than ever before nown. The public are aware that our Govern had scientific men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless; whereas, the inventor of the Galvanio Cement, has labored twenty years to combine articles to obviate those difficultes, and can testify from his org experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Coment is the cheapest and best atticler ver before known. The combination of this Cement is such hat it is calculated for entire new roofs, flat or steep, coving over old shingles without removing them; lining av.-troughs, scaming around battlements, chimneys and sy-lights. Covering car-tops, steamer-decks, &c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and cold, better than any thing ever in owns, on reasonable terms.

Mr. Bemoett, has done some annul amount of roofing for me in his peculiar way, with Cotton stuff, coated with a preparation the basis of which appears to be a Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the citch and protects it from the influence of the air and water. The Composition does not liquity and run from the ifficia of the heat of the sort in aummer; her does it harden and crack from the influence in the cold of winter.

They are gently un ulating, and the portions not cleared studded with fine oak, poplar, hickory, walnut, and other studded with fine oak, poplar, hickory, walnut, and other descriptions of timber, producing mast in abundance.—Charley's creek, an unfalling stream, furnishing an abundance of water, runs through the centre of them, and there are, in addition, twenty fine Springs scattered through thom. The soil is well adapted to the cultivation of Corn, Wheat, Oats, all the small grains, and domestic grasses, and will compare favorably with the best Warren county lands. Producing grass spontaneously, in abunance, there is no better range for cattle and sheep in the State. A portion of the lands are improved, there being some eight or ten cultivated farms, with cottages, upon the tract, independent of the beautiful residence of Mr. Glascock. The whole body of them has, however, here chester and McMinnville Railroad, which is but seven ailes distant, affor a an outlet to market. The town of McMinnville, the county seat, is but nine miles off, near which it is believed the great Southern University, to be established under the auspices of the Episcopal church, will be located; thus enhancing the value of all the lands in the neighborhood. The celebrated watering piace, Beersheba, is but 25 miles distant. The healthfulness of this portion of Middle Tennessee is proverblal, it is the Summer retreat of numbers of persons from the South. This rate will afford an unusually fine opportunity to those desirous of purchasing stock farms, in one of the best sections of the State, and it is hoped that all such, as well as those who may with marely to obtain a place of refuge from the heats of summer, will examine these lands. A free Barbecue will be prepared at the Big Spring, bead of Charley's Greek, for the accommodation of all who
